

# A New World of Print Quality

*With LUX® Flat-Top Dots from MacDermid*

**When you want to elevate the quality and consistency of your flexo print, look to the global leader in flat-top dots, MacDermid's LUX Platemaking process.** With more than 150 installations spread throughout the world, MacDermid's LUX Platemaking process has proven that it can consistently rival the quality of gravure and offset. LUX is touted by users around the globe as technology that enables other pre-press print technologies to perform even better. And as the simplest, most cost-effective way to incorporate flat-top dots into your workflow, choosing LUX is one of the easiest decisions you can make for your business.

When you're looking to take your flexo print to new heights, count on the global leader in flat-top dots, MacDermid.
